

## **ABSTRACT OF THE DISCLOSURE**

A wheel support bearing assembly includes an outer member and a hub axle having a wheel mounting flange and a raceway surface. The angle of the fiber flow relative to the raceway surface in the hub axle is chosen to be equal to or smaller than  $15^\circ$ . The angle of the fiber flow relative to a raceway surface of the outer member is also chosen to be equal to or smaller than  $15^\circ$ .
